Global Energy Week

27, 28 & 29 June 2023, London

Bringing the world's energy community together

The Energy Circle and the Net-Zero Circle, by IN-VR, are delighted to host leaders of the world's energy communities in London.

Following the notable success of the first and second editions of the Global E&P Summits, Global Energy Week is the opportunity to be at the forefront of the latest developments and access first-hand industry insights.

This year's physical edition will once again bring together Energy leaders from Africa, Europe, Latin America, Asia and the Middle East through three days of non-stop networking and presentations from the world's most prominent Funds and IOCs/ IECs.

There will be an abundance of activities, from high-level drinks receptions to VIP private cocktails and our sold-out IN-VR Capacity Building Programme for Governments.

This edition will focus on the following thematic to foster discussions and MoUs, as well as accelerated investment to developing countries:

- **Accelerating the Just Energy Transition** in Africa and beyond, while recognizing the importance of existing deals and new exploration activities.
- **Securing investment in the regions' oil, gas, hydrogen and renewable projects** to meet the need for energy security and avoid energy poverty.
- **Presentations of the most notable global projects and Licensing Rounds.**

We are looking forward to meeting you in London.
